## DALI 2Ch LED Dimmer CV

### Datasheet Control Gear

2-channel LED Dimmer (CV, DT6)

Art.Nr. 89453827 (4A)

Art.Nr. 89453833 (8A)

Art.Nr. 86459561 (10A)

Art.Nr. 89453830 (16A)

# DALI 2Ch LED-Dimmer CV Control Gear

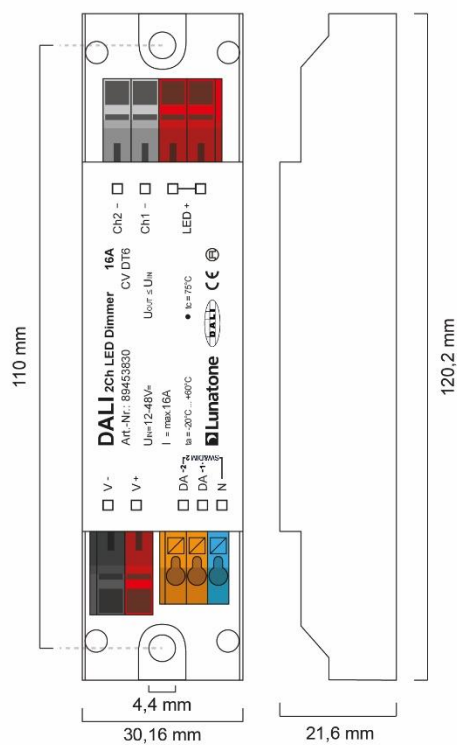

## Overview

- 2 channel DALI LED-Dimmer
- suitable for constant voltage LED-modules with operating voltages from 12V to 48V
- **Operating Mode DT6:** individual channel control via 2 DALI addresses
- **Operating Mode Balance&Dim:** control by 2 DALI-addresses, one for adjusting the light level and one for adjusting the channel balance (e.g. colour temperature)
- **Operating Mode Dim2Warm:** one DALI-address for simultaneous adjustment of light level and colour temperature
- **SwitchDim2:** 2 switch-inputs offer control of light level and colour without DALI
- dimming range 0.1%-100%
- adjustable PWM-frequency (122Hz/244Hz/488Hz/976Hz)
- compact types for integration in luminaires or remote ceiling
- supply voltage type dependent of 12V to 28V DC or from 12V to 48V DC (according to the operating voltage of the led modules)
- type dependent max. input currents of 4A, 8A, 10A or 16A
- the maximum input current can be distributed on the channels at will
- low standby power consumption
- high efficiency
- configuration via PC-software DALI-Cockpit and DALI USB-interface
- user-friendly factory default settings

## Specification, Characteristics

type	DALI 2Ch Led Dimmer CV			
article number	89453827	89453833	86459561	89453830
<b>electrical data:</b>				
supply voltage Vin	12V-28VDC	12VDC-48VDC		
maximum input current linmax	4A	8A	10A	16A
control input	DALI	DALI SwitchDim2 (mains voltage)		
current consumption DALI	2mA			
number of DALI-addresses	operating mode Dim2Warm: 1 operating mode DT6, Balance&Dim: 2			
standby power consumption (12V)	120 mW			

type	DALI 2Ch Led Dimmer CV			
article number	89453827	89453833	86459561	89453830
<b>technical data:</b>				
power on behaviour	configurable via DALI: 0%-100% or last value			
ambient temperature	-20°C to +60°C			
expected lifetime (at Tc<=75°C)	>100000h			
protection class	IP20			
max. connecting wire cross section	1.5 mm <sup>2</sup>		1.5 mm <sup>2</sup> , supply (V+, V-): 2.5 mm <sup>2</sup>	
dimensions (LxWxH)	40x28x14 mm	59x33x15 mm	120x30x22 mm	
housing/mounting	back box		remote ceiling	

dimensions remote ceiling

connection plan remote ceiling

dimensions back box 8A

connection plan back box 8A

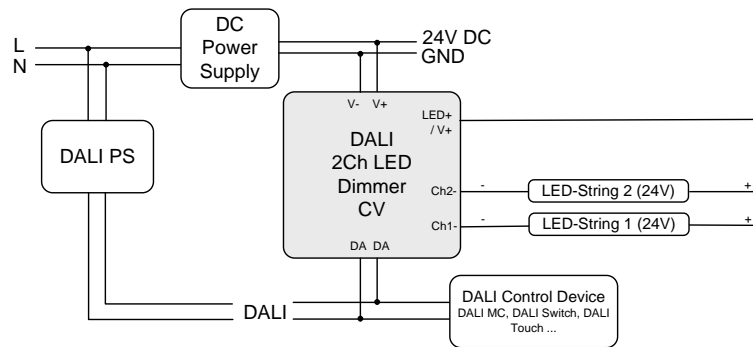

dimensions back box 4A

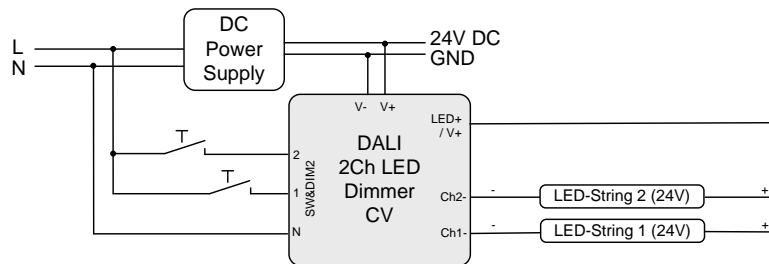

connection plan back box 4A

RECOMMENDATION: Care should be taken on keeping cable lengths between DC power supply and dimmer as well as between dimmer and luminaires (Led-Strings) as short as possible. This kind of installation will minimize the influence of voltage drops.

DALI:

SwitchDim2:

## Operating Modes

The device offers several operating modes:

### DT6 (factory default)

In this operating mode each channel can be controlled by its own DALI address (Device Type 6).

Alternatively the device can be controlled using 2 switch-inputs for mains voltage (SwitchDim2):

SwD1: light level

short press: On/Off

long press: dimming

SwD2: scene selector (short press)

### Balance&Dim

This operating mode is also suitable for operating tunable white luminaires using two DALI-addresses. The first controls the light level and the second is used for changing the distribution on the output channels (e.g. for tunable white applications or balancing direct/indirect lighting).

The Balance&Dim mode allows colour temperature adjustments without affecting the light level and vice versa. For each channel only DALI-standard commands like dim up/down but also DAP are used. Thus the device can be used with all common controls and gateways (e.g. KNX). The Balance&Dim mode provides an alternative to the DT8-Tc mode.

Can be operated via DALI or SwitchDim2:

DALI-address 1, SwD1: light level

DALI-address 2, SwD2: balance

### Dim2Warm

Both output channels are controlled by one DALI-address or SwD-input. The balance is coupled directly to the DALI dim level – the smaller the dim level the warmer the light.

DALI-address 1, SwD1: Dim2Warm (Master)

short press: On/Off

long press: dimming

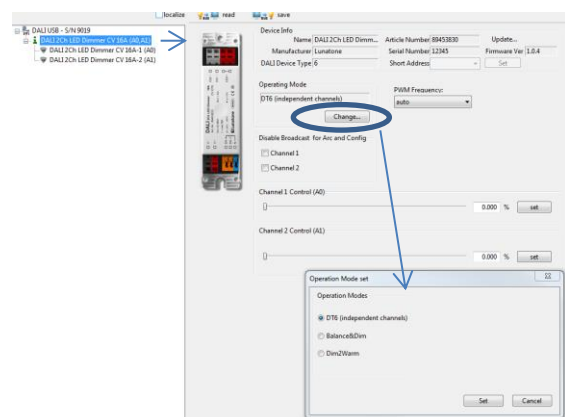

SwD2: scene selector

### Selection of operating mode

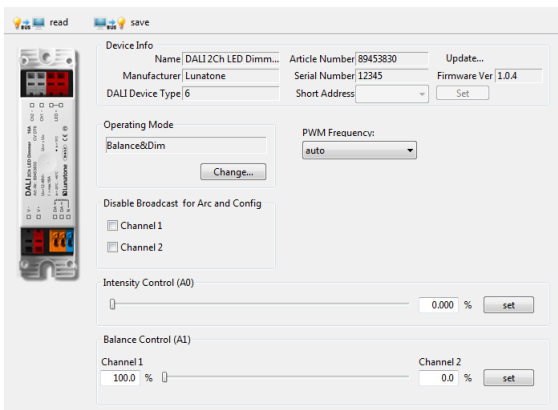

With the help of the PC-software tool DALI-Cockpit the operating mode can be easily set on the general settings page.

Operating mode DT6:

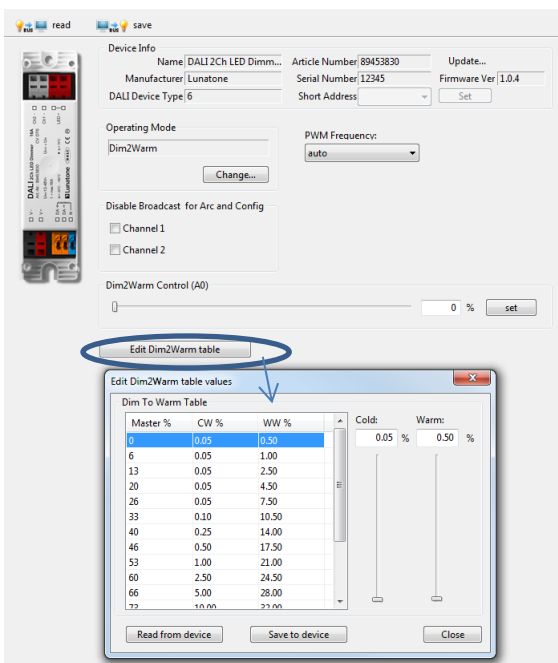

In addition, on the same page the PWM-frequency can be selected and basic control elements for testing each operating modes are available (2 sliders for the level of each channel in operating mode DT6; Balance&Dim: slider for level and balance, Dim2Warm: slider for input value adaption and Edit-Function for the Dim2Warm-table). Furthermore the broadcast control can be deactivated for each channel individually.

Operating Mode Balance&Dim:

Operating Mode Dim2Warm:

Switching between operating modes can also be done with the help of the DALI-command SET OPERATING MODE (IEC 62386-102 Ed.2). When changing the operating mode the

number of used DALI-addresses can change as well and this requires a new addressing procedure. In the DALI-Cockpit this address assignment is performed automatically.

Operating Mode:

Number	Operating Mode
0x0	DT6 (factory default)
0x90	DT6
0x94	Balance&Dim
0x95	Dim2Warm

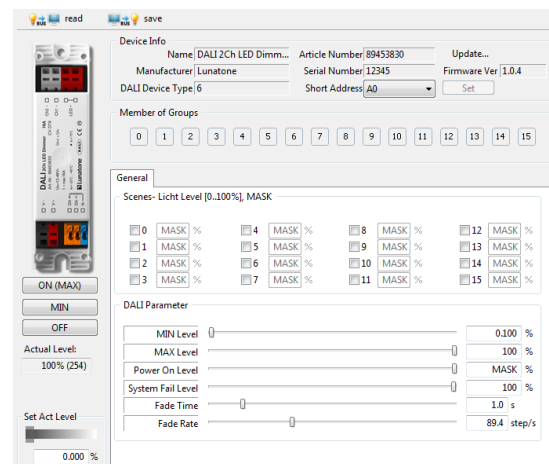

Additional Settings

Besides the settings on the general page each channel can be selected separately in the component tree for individual configuration.

Component Tree:

Settings for each channel (similar for all operating modes), the displayed parameters are the factory default values:

For each address the group membership can be set as well as scene values and DALI-parameters. In Balance&Dim operating mode

all values assigned to channel 2 are representing the balance.

## Factory Default Settings

Before the initial addressing is performed, the device can already be controlled by group addresses G0 and G1. This predefined grouping will be deleted during the first addressing procedure. Afterwards groups can be assigned as usual (e.g. with the help of the DALI Cockpit). By sending a DALI-Reset command the device is set to DALI default values as defined in the standard.

Summary of the factory default settings (delivery state):

operating mode	DT6		
SwitchDim2	SwD1: light level SwD2: scene selector		
Min Level	0.1%		
PowerOn Level	MASK (last value)		
Fade Time	2 (1s)		
Fade Rate	5 (89.4 steps/s)		
PWM-frequency	122Hz		
Groups before initial addressing:	G0 – channel 0 G1 – channel 1		
predefined scene values	<b>Scene</b>	<b>Ch1</b>	<b>Ch2</b>
	0, 4, 8, 12	100%	0%
	1, 5, 9, 13	0%	100%
	2, 6, 10, 14	100%	100%
	3, 7, 11, 15	0%	0%

## Purchase Order Information

**Art.Nr. 89453827:** 2-channel LED Dimmer, CV, max. input current 4A, 12V-28V DC, back box

**Art.Nr. 89453833:** 2-channel LED Dimmer, CV, max. input current 8A, 12V-28V DC, SwitchDim2, back box

**Art.Nr. 86459561:** 2-channel LED Dimmer, CV, max. input current 10A, 12V-48V DC,

SwitchDim2, remote ceiling & integration in luminaires

**Art.Nr. 89453830:** 2-channel LED Dimmer, CV, max. input current 16A, 12V-48V DC, SwitchDim2, remote ceiling & integration in luminaires
